May 7, 2022

VICTORVILLE, Calif. (VVNG.com) – High Desert citizens can get a FREE 1-pound reusable/refillable lp bottle Saturday at the City of Victorville’s Household Hazardous Waste Collection Center (HHWCC). **May 14th** out of **8:00 a.m. – 12:00 p.m** while stocks last.

The City of Victorville HHWCC lies on Loves Lane off Desert Knoll Drive, behind the San Bernardino County Fairgrounds.

To get a totally free multiple-use lp bottle, citizens might bring several empty 1 pound non reusable lp bottles for disposal OR they might merely sign a promise to stop utilizing single-use non reusable bottles. (Note: No other harmful family waste items will be accepted for disposal throughout this unique occasion: just 1 pound lp bottles will be accepted.)

This occasion is sponsored by the Mojave Desert & Mountain Recycling Authority in collaboration with the City of Victorville and the California Product Stewardship Council (CPSC). Funding for this occasion originates from a grant from CalRecycle, the California Department of Resource Recycling and Reclamation.

One complimentary multiple-use bottle is minimal per family. For more details about this occasion, call the City of Victorville Department of Environmental Programs at 760-955-8615.

Additional Background Info: As households get ready for the 2022 outdoor camping season, the Mojave Desert and Mountain Recycling Authority is advising campers and tailgaters to “sustain your enjoyable” by utilizing multiple-use lp containers rather of single-use types.

One-pound lp cylinders are typically utilized to power a range of devices consisting of camp ranges, portable heating units, lanterns, portable showers, boat engines, scooters, and yard care devices. Although practical for the customer, the non reusable cylinders position issues when it comes time to deal with them. Disposable lp cylinders need to be required to a regional harmful family waste collection point for appropriate and safe disposal. (Some parks and camping areas likewise have different collection bins for lp cylinders.) However, lots of single-use lp cylinders are incorrectly disposed of in trash or recycling bins. This can trigger fires or surges when shredded or compressed in collection automobiles or at recycling centers.

However, even if the cylinders are appropriately gotten rid of at a home contaminated materials collection center, they are really pricey to manage, generally costing in between \$2 and \$15 per container for transport, healing of remaining gas, and ultimate recycling of the cylinder for scrap metal. Municipalities and parks pay these disposal expenses.

Locally, Joshua Tree National Park gets rid of over 700 undesirable one-pound cylinders from park camping areas every week that expense countless dollars to deal with. The Victor Valley Materials Recovery Facility, which serves citizens of High Desert and San Bernardino Mountain, has actually seen baler fires most likely triggered by containers taking off.

Disposable 1 pound lp cylinders need to not be filled up as needed by the United States Department of Transportation to prevent fire risks. Watch the security video to discover the risks of filling up non-refillable lp cylinders.

Residents of Victor Valley might deal with unused one pound lp cylinders complimentary of charge at the City of Victorville HHWCC on Loves Lane behind the County Fairgrounds throughout routine hours Wednesday and Sunday from 9:00 am to 4:00 pm. Additional family contaminated materials collection points are offered in Apple Valley and Hesperia. Call the San Bernardino County Fire at 1-800-645-9228 to learn more on hours and places of other family contaminated materials centers.

The Mojave Desert and Mountain Recycling Authority, dealing with the Refuel Your Fun Campaign, got a CalRecycle grant to inform citizens about the safe usage of 1-pound lp bottles and the advantages of multiple-use bottles to conserve cash and minimize

contaminated materials to minimize. Watch this brief (45 2nd) educational video that includes an interview with a State Parks Ranger and the risks of incorrectly dealing with one-pound lp cylinder waste.

By changing to multiple-use, refillable 1-pound lp bottles, citizens can conserve cash, minimize waste, lower disposal expenses and save resources. There are a variety of places in the High Desert where multiple-use 1 pound lp bottles can be filled up or exchanged consisting of U-Haul at 14598 Palmdale Road in Victorville (refill), U-Haul in Barstow, Vagabond Welding in Yucca Valley (refill), and the mobile station at 29 Palms (interchange). For a total list of places and addresses that can fill up or exchange 1 pound lp cylinders, see www.refuelyourfun.org or contact Info@calpsc.org

Refuel Your Fun remains in the procedure of signing up extra lp refill places. Retailers thinking about finding out more about taking part in the program needs to get in touch with CPSC at Info@calpsc.org.
